1. Introduction

The Common Reporting Standard (CRS) and due diligence standard for the automatic exchange of financial account information was developed by the OECD and is incorporated into the European Council Directive 2014/107/EU of 9 December 2014 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in tax matters.

These provisions are transposed by the law of 18 December 2015 on the Common Reporting Standard (CRS), published in [Mémorial A – No 244 of 24 December 2015](#).

Updating the CRS (Revised CRS)

[The Act of 27 March 2026 on the mandatory automatic exchange of information reported by Service Providers on Crypto-assets](#) introduces a number of new provisions in the CRS Act that aim to extend the scope of the CRS to digital financial products, strengthen due diligence procedures as well as incorporate more detail into the information reported.

These new provisions apply from 1^{er} January 2026 with a first communication to the Luxembourg Inland Revenue by 30 June 2027 at the latest for the account of the 2026 tax year.

Details on the update of the electronic transfer of information published by the OECD can now be found at this link. The Luxembourg Inland Revenue expects to publish a user manual for the electronic transfer of CRS information in the third quarter of 2026. This user manual will replace ECHA Technical Circular No. 4.

Please note that the update of the transfer terms and conditions published in this user manual will only be applicable from the beginning of 2027. Until then, the current transfer arrangements, set out in ECHA Technical Circular No. 4, remain applicable.

2. Purpose

The law introduces the automatic exchange of information relating to financial accounts in tax matters with the Member States of the European Union and Luxembourg's other partner jurisdictions.

This is a mandatory international exchange of information between competent tax administrations concerning:

- › financial accounts held with Financial Institutions in Luxembourg by residents for tax purposes of CRS Participating Jurisdictions;
- › on financial accounts held with Financial Institutions in CRS Participating Jurisdictions by Luxembourg residents for tax purposes.

3. Information to be exchanged

The CRS requires Financial Institutions to identify their customers and to transmit to the tax authorities information concerning the identity, account, account balance and related financial income of each person who is a tax resident of a Reportable Jurisdiction.

Zero-value message (ZeroReporting) mandatory

From 1^{er} January 2021, Luxembourg Reporting Financial Institutions are required to communicate a zero-value message (ZeroReporting) when they do not have any Reportable Accounts.

The Luxembourg Inland Revenue is particularly keen to draw the attention of financial institutions that qualify as non-reporting financial institutions under the FATCA Act as "Luxembourg Investment Advisors and Investment Managers" (see Section IV., point C., of Annex II of the Intergovernmental Agreement between Luxembourg and the United States of America on FATCA) to this change. In the absence of an equivalent status under the CRS Act, these Financial Institutions are in principle Luxembourg Reporting Financial Institutions under the CRS Act and will therefore be required to communicate a zero-value message, whereas they are exempt from this under the FATCA Act.

4. Deadlines

Luxembourg financial institutions are required to provide the information to the ACD, annually, until 30 June after the end of the calendar year to which the information relates.

5. Electronic Data Transfer

The data is transferred exclusively via a secure channel. The companies (transmitters) offering this service are:

- › [FUNDSQUARE](#), a branch of the Luxembourg Stock Exchange with their [e-File product](#)
- › [WORLDLINE](#) with their [SOFiE product](#)

Similar to FATCA, the ACD has provided pre-validation and production platforms. Relevant Financial Institutions are requested to ensure that end-to-end testing with the ACD is performed via the pre-validation environment. ECHA Technical Circular No. 4 contains all the relevant modalities.

Since 1 January 2021, the amended law of 18 December 2015 on the Common Reporting Standard (CRS) provides that Luxembourg Reporting Financial Institutions are required to communicate a zero-value message (ZeroReporting) when they do not have any Reportable Accounts.

Thanks to MyGuichet (guichet.lu's secure interactive platform), a procedure allows Luxembourg reporting financial institutions or their depositing entity to make a declaration of a message with a zero value CRS through an input wizard. It is not possible to drop a

zero-value message in XML format. The transmission of a zero-value message is still possible via existing (forwarding) companies, either by means of their input form or by an XML deposit.

If the Luxembourg Reporting Financial Institution has Reportable Accounts, the declaration must be made through the companies (transmitters) offering this service, namely:

This new MyGuichet approach is available from Monday 3 May 2021.

6. FAQ-NCD of the Luxembourg Inland Revenue (ACD)

The [Frequently Asked Questions \(FAQ-NCD\)](#) will be regularly supplemented and updated.

7. Contacts

The "[Exchange of Information and Interest Tax Withholding Division](#)" and the "[Interest Tax Withholding Office](#)" are responsible for, among other things, the implementation of the CRS within the CDA.
